

MASTERCLASS IN THERANOSTICS

360 DEGREES ON PROSTATE-SPECIFIC
MEMBRANE ANTIGEN [PSMA] THERANOSTICS

11th - 12th March 2023

Retreat Auditorium, MIOT International, Chennai

Dear Colleague and Friend,

Greetings from MIOT International!

The Department of Nuclear Medicine, MIOT International in collaboration with the Society of Nuclear Medicine (SNM) India - Southern Chapter, presents the first series of "Masterclass in Theranostics - 360 degrees on PSMA Theranostics" at MIOT International, Chennai.

MIOT International was one of India's first hospitals to adapt and provide advanced diagnostics and complete therapeutic specialty through Nuclear Medicine. With over two decades of expertise in radionuclide therapy, MIOT has gained a reputation as a thought leader in offering a wide modality of cancer treatments in the armamentarium of medical science.

MIOT's experts have exponentially centred on the era of "Radiolabelled Targeted Therapy or Theranostics," which is the standard of care for specific malignancies and a part of multi-disciplinary care for cancer patients.

MIOT International envisions sharing the scientific knowledge and prominence of Nuclear Medicine with the medical fraternity. This platform is created in order to exchange scientific practices, current evidence, clinical perspectives; panel discussions, debates, challenging case discussions and scan reading sessions to delve into the gamut of PSMA Theranostics, from the expert team of MIOT faculty and renowned professionals from all over the world. Learn from the best, and imbibe knowledge directly from the masters.

This academic programme will therefore focus on key areas to train nuclear medicine physicians, radiologists, technologists as well as clinical colleagues (surgical, medical and radiation oncologists and urologists) to understand a holistic approach in the management of patients using PSMA Theranostics.

We look forward to seeing you in India's health capital for this academic feast.
Kindly block your dates!

Dr. Prithvi Mohandas
Managing Director - MIOT International
